4.1. ORGANIZATION

Four Bees Engineering Services is a sole proprietorship owned by Zedref Yakof Fernandez, who leads the company with a vision of delivering top-notch compressed air systems and engineering services. The company is officially registered and approved by the Department of Trade and Industry (DTI), ensuring that all our operations are compliant with local regulations.

Our team consists of 33 dedicated workers and personnel, all of whom hail from Cebu and are classmates from college. This close-knit group brings a strong sense of camaraderie and collaboration, which translates into efficient teamwork and excellent project outcomes. Our workforce is skilled in various aspects of compressed air systems and engineering services, enabling us to provide comprehensive solutions to our clients.

At Four Bees Engineering Services, we pride ourselves on our highly capable team and our commitment to fostering a supportive and innovative work environment. Our organizational structure is designed to maximize efficiency, with clear roles and responsibilities that ensure every project is completed to the highest standards.

- Tsuneishi Heavy Industries (Cebu)
Buanoy, Balamban, Cebu, Philippines
Position: On-the-job Trainee
- Carmen Copper Corporation
DAS Lutopan, Toledo City, Cebu
Position: Work Immersion Student (May 2019)

SUPPLY CHAIN MANAGEMENT TEAM DIRECTOR:

DAMIEN JEFFERSON B. PATPAT

WORK EXPERIENCES:

- The Area President of the Church of Jesus Christ of Latter-Day Saints Inc.
Gorordo Avenue, Lahug, Cebu City
Position: Facility Engineer Intern

TECHNICAL TEAM DIRECTORS:

INSTALLATION

JADE EMMANUEL I. GASTADOR

WORK EXPERIENCES:

Oriental Port and Allied Services Corp. (OPASCOR)
B. Benedicto St, Cebu City, 6000 Cebu
On-Job-Training Student

FABRICATION

JUBILEE GRACE ATAMOSA

WORK EXPERIENCES:

- LISA
ARPILI, BALAMBAN, CEBU
On-Job-Training Student

4.3. RISK MANAGEMENT

At Four Bees Engineering Services, we recognize that identifying and mitigating risks is crucial to the successful execution of our projects and the sustainability of our business. Our risk management strategy is designed to proactively address potential issues that could impact our operations, financial health, and reputation. Below are the key components of our risk management plan:

Risk Identification:

We identify potential risks in the following areas:

- **Operational Risks:** Delays in project timelines, equipment failures, supply chain disruptions.
- **Financial Risks:** Cash flow issues, cost overruns, fluctuations in material prices.
- **Market Risks:** Changes in market demand, increased competition, economic downturns.
- **Compliance Risks:** Regulatory changes, safety violations, environmental impact.
- **Human Resources Risks:** Employee turnover, skill gaps, labor disputes.

Risk Assessment:

Each identified risk is assessed based on its likelihood and potential impact. We prioritize risks that have a high probability of occurrence and could significantly affect our business. This assessment helps us allocate resources effectively to mitigate the most critical risks.

Risk Mitigation Strategies:

- **Operational Risks:**
 - Implementing strict project management protocols to ensure timely delivery.
 - Regular maintenance and upgrades of equipment to minimize downtime.
 - Establishing strong relationships with multiple suppliers to prevent supply chain disruptions.
- **Financial Risks:**
 - Maintaining a healthy cash reserve to address unexpected financial challenges.
 - Regularly reviewing and adjusting budgets to control costs and avoid overruns.
 - Hedging against material price fluctuations through contracts or forward buying.
- **Market Risks:**
 - Conducting market research to stay informed about industry trends and demand.
 - Diversifying our service offerings to appeal to a broader client base.
 - Developing a robust marketing strategy to strengthen our competitive position.
- **Compliance Risks:**
 - Staying up-to-date with regulatory requirements and ensuring full compliance.
 - Implementing comprehensive safety protocols to prevent accidents and violations.
 - Conducting regular environmental impact assessments to minimize our footprint.
- **Human Resources Risks:**
 - Offering competitive salaries and benefits to attract and retain top talent.
 - Providing ongoing training and development to address skill gaps.
 - Promoting a positive work environment to reduce turnover and enhance employee satisfaction.

Risk Monitoring and Review:

We continuously monitor our risk landscape to identify new risks and reassess existing ones. Regular risk reviews are conducted to evaluate the effectiveness of our mitigation strategies and make necessary adjustments. We also maintain open communication with all stakeholders to ensure that emerging risks are promptly addressed.

Contingency Planning:

For high-impact risks that cannot be entirely mitigated, we develop contingency plans to ensure business continuity. These plans outline the steps to be taken in the event of a risk materializing, including communication protocols, resource allocation, and recovery procedures.

By implementing this comprehensive risk management plan, Four Bees Engineering Services aims to safeguard our operations, financial health, and reputation, ensuring the long-term success and stability of our business.

4.4. RECORD-KEEPING FUNCTIONS

Effective record-keeping is vital for the efficient operation and regulatory compliance of Four Bees Engineering Services. Our record-keeping functions are designed to ensure that all essential documents and data are accurately maintained, securely stored, and easily accessible. This includes records related to our projects, financial transactions, personnel, and compliance activities. Below are the key components of our record-keeping functions:

Project Records:

- **Project Documentation:** Detailed records of all project plans, designs, specifications, and contracts.
- **Progress Reports:** Regular updates on project milestones, timelines, and any deviations from the plan.
- **Completion Reports:** Comprehensive documentation of completed projects, including outcomes, client feedback, and lessons learned.
- **Technical Records:** Maintenance logs, equipment manuals, and technical specifications related to our compressed air systems.

Financial Records:

- **Accounting Records:** Detailed accounts of all financial transactions, including income, expenses, and investments.
- **Budget Reports:** Regularly updated budgets for all projects and operations.
- **Tax Records:** Documentation of all tax filings, payments, and correspondence with tax authorities.
- **Payroll Records:** Comprehensive records of employee salaries, wages, bonuses, and deductions.

Personnel Records:

- **Employee Files:** Personal information, employment contracts, performance evaluations, and training records.
- **Attendance Records:** Detailed logs of employee attendance, leave, and overtime.
- **Safety Records:** Documentation of safety training, incident reports, and compliance with occupational health and safety regulations.

Compliance Records:

- **Regulatory Compliance:** Records of all licenses, permits, and certifications required for our operations.
- **Environmental Records:** Documentation of our efforts to minimize environmental impact, including energy consumption and emissions data.
- **Audit Reports:** Reports from internal and external audits, including findings and corrective actions taken.

Data Security and Confidentiality:

- **Secure Storage:** All records are stored securely, both physically and digitally, to prevent unauthorized access.
- **Backup Systems:** Regular backups of digital records to ensure data integrity and availability in case of system failures.
- **Confidentiality Policies:** Strict policies to ensure the confidentiality of sensitive information, with access restricted to authorized personnel only.

Record-Keeping Procedures:

- **Standardized Formats:** Use of standardized formats for all records to ensure consistency and ease of retrieval.

- **Regular Reviews:** Periodic reviews of records to ensure accuracy, completeness, and compliance with regulatory requirements.
- **Training:** Ongoing training for staff on best practices for record-keeping and data management.

By maintaining robust record-keeping functions, Four Bees Engineering Services ensures that all critical information is preserved and accessible, supporting effective decision-making, regulatory compliance, and continuous improvement in our operations.
